Rizzo/STF/AGENCY@DCI,
Subject: Approval Authority to Extend Use [redacted]

Per our conversation regarding the need to obtain approvals for EITs [redacted] spoke with [redacted] to confirm that (1) the NSC does not need to be involved in extending the use of EITs [redacted] that it is within CIA's authority to extend the EITs if needed; and (2) that he will ask the ADCI whether he wishes to be involved in the approval of the extension, but advised me to consider the DDO to be the approval authority for an extension and reapprovals unless he calls me and tells me the ADCI wants to be involved.

Subject: Approval Authority to Extend Use of EITs

Nice to talk to you -- the above is my lotus notes address for future. Per our conversation and re the DDO's questions, I understand that for extensions of EIT there is no requirement to revert back to the NSC (as in the extension for [redacted] unless there is a request for additional measures or techniques. That is, the NSC does not need to vet the authority every 30 days but the required extension (30 day review) is under DDO authority only. Thanks for confirming.
